MODULE HANDBOOK

| Computational Mathematics | | | | | |
|---|--|--|--|--|--|
| Computational Mathematics Bachelor | | | | | |
| MMM-3401 | | | | | |
| | | | | | |
| | | | | | |
| E4 (CC1) | | | | | |
| 5 th (fifth) | | | | | |
| | | | | | |
| Chair of the Lab. of Mathematical Computation | | | | | |
| Dr. Sumardi, M.Si and Imam Solekhudin, Ph.D | | | | | |
| Bahasa Indonesia | | | | | |
| Bachelor Degree, Compulsory, 5th semester | | | | | |
| 100 minutes lectures, 240 minutes structured activities (homework and task), and 170 | | | | | |
| minutes laboratory work per week. | | | | | |
| Total workload is 136 hours per semester, which consists of 100 minutes lectures per | | | | | |
| week for 14 weeks, 120 minutes structured activities per week, 120 minutes individual | | | | | |
| study per week, and 170 minutes laboratory work per week, in total is 16 weeks per | | | | | |
| semester, including mid exam and final exam. | | | | | |
| 3(1) | | | | | |
| Students have taken Computational Mathematics course (MMM-3401) and have an | | | | | |
| examination card where the course is stated on. | | | | | |
| Students have taken Introduction to Numerical Analysis course (MMM-2401), | | | | | |
| Introduction to Partial Differential Equations course (MMM-2310), and have | | | | | |
| participated in the final examination of the course. | | | | | |
| Before taking this course, students must have a good understanding about concepts | | | | | |
| of advanced calculus, ordinary and partial differential equation. | | | | | |
| After completing this course the students have ability to | | | | | |
| CO1. demonstrate knowledge and understanding of mathematical computing | | | | | |
| CO2. motivate and describe the derivation of the numerical algorithms covered in the | | | | | |
| module | | | | | |
| CO3. carry out simple numerical processes "by hand" | | | | | |
| CO4. implement, evaluate, contrast and reflect upon the numerical results arising | | | | | |
| from different algorithms. | | | | | |
| Topic: | | | | | |
| 1. Solution of nonlinear and linear equations system using Newton Methods | | | | | |
| and iterative methods, | | | | | |
| 2. interpolation: Hermite interpolation, splines, trigonometric interpolation, Fast | | | | | |
| Fourier Transform, multivariable function interpolation, function | | | | | |
| approximation Theory, | | | | | |
| 3. Numerical Integral: Newton-Cotes method and Romberg method, Gaussian | | | | | |
| quadrature, Improper integrals, | | | | | |
| 4. Numerical Solution Ordinary Differential Equations: Runge-Kutta Methods, | | | | | |
| Multistep Methods | | | | | |
| 5. Numerical for Partial Differential Equations : Finite Difference Methods and | | | | | |
| Finite Element Method. | | | | | |
| | | | | | |

| Study and examination | The final mark will be weighted as follows: | | | | | | | |
|---------------------------|--|--|--|--|--|--|--|--|
| requirements and forms of | No Assessment methods (components, activities) Weight (percentage) | | | | | | | |
| examination | 1 Final Examination 30 | | | | | | | |
| | 2 Mid-Term Examination 25 | | | | | | | |
| | 3 Laboratory 25 | | | | | | | |
| | 4 Class Activities: Quiz, Homework, etc 20 | | | | | | | |
| | | | | | | | | |
| | The initial cut- off points for grades A, B, C, and D should not be less than 80%, | | | | | | | |
| | 70%, 50%, and 40%, respectively. | | | | | | | |
| Media employed | White/Black Board, LCD Projector, Laptop/Computer, Laboratory | | | | | | | |
| Reading List | ng List 1. John Penny, 1995, Numerical Methods Using MATLAB. | | | | | | | |
| | 2. Jan Kiusalaas, 2010, Numerical Methods in Engineering with MATLAB | | | | | | | |
| | 3. Won Y. Yang, Wenwu Cao, Tae S. Chung, John Mor, 2005, Applied Numerical | | | | | | | |
| | Method Using MATLAB. | | | | | | | |
