## Undergraduate Programme in Mathematics

Email : maths1@ugm.ac.id; kaprodi-s1-matematika.mipa@ugm.ac.id
sekprodi-s1-matematika.mipa@ugm.ac.id
Website : http://s1math.fmipa.ugm.ac.id/

| Module name | Calculus II |
| :---: | :---: |
| Module level, if applicable | Bachelor |
| Code, if applicable | MMM-1102 |
| Subtitle, if applicable | - |
| Courses, if applicable | Calculus II |
| Semester(s) in which the module is taught | $2^{\text {nd }}$ (second) |
| Person responsible for the module | Chair of the Lab. of Analysis |
| Lecturers | Team |
| Language | Bahasa Indonesia |
| Relation to curriculum | Compulsory course in the first year (2 ${ }^{\text {nd }}$ semester) Bachelor Degree |
| Type of teaching, contact hours | 150 minutes lectures and 180 minutes structured activities per week. |
| Workload | Total workload is 136 hours per semester, which consists of 150 minutes lectures per week for 14 weeks, 180 minutes structured activities per week, 180 minutes individual study per week, in total is 16 weeks per semester, including mid exam and final exam. |
| Credit points | 3 |
| Requirements according to the examination regulations | Students have taken Calculus II course (MMM-1102) and have an examination card where the course is stated on. |
| Recommended prerequisites | Students have taken Calculus I (MMM-1101) and have participated in the final examination of the course. |
| Module objectives/intended learning outcomes | After completing this course the students should have: <br> 1. CO 1. ability to solve indefinite integral problems with suitable methods. <br> 2. CO 2. ability to determine the integral value of a function on interval $[a, b]$ by using the definition of the definite integral. <br> 3. CO 3. ability to use the Fundamental Theorem of Calculus and Change of Variable method in integration. <br> 4. CO 4. ability to characterize and solve the improper integral. <br> 5. CO 5. ability to apply the definite integral to determine the area, volume of solids of revolution, arc length, area of surface of solids of revolution, center of mass, and moment of inertia. |
| Content | - Indefinite integral: definition, properties, methods. <br> - The Definite integral: definition, properties, The Fundamental Theorem of Calculus, Change of Variable in a Definite Integral, Improper integrals. <br> - Applications of Integration: area, volume of solids of revolution, arc length, surface area of a solid of revolution, center of mass, Pappus-Guldin's Theorem, moment of inertia. |
| Study and examination requirements and forms of examination | The final mark will be weighted as follows: <br> The initial cut-off points for grades $\mathrm{A}, \mathrm{B}, \mathrm{C}$, and D should not be less than $80 \%, 70 \%$, $50 \%$, and $40 \%$, respectively. |

| Media employed | Board, LCD Projector, Laptop/Computer |
| :--- | :--- |
| Reading List | 1. James Stewart, 2015, Calculus: Early Transcendentals Single Variable 8th Ed., Willey, |
|  | 2. USA |
|  | 3. Jobert A. Adam and Christopher Essex, 2010, Calculus, A Complete Course, Pearson. |
|  | 4. Abes Stewart, 1999, Calculus, 4th edition, Brooks/Cole Pub. Comp. |
|  | 5. Tim Pengajar Kalkulus, Diktat Kuliah Kalkulus I, FMIPA UGM. |
|  |  |
|  |  |

## PLO AND CO MAPPING

|  | PLO 1 | PLO 2 | PLO 3 | PLO 4 | PLO 5 | PLO 6 | PLO 7 | PLO 8 | PLO 9 |
