## MODULE HANDBOOK

Module name	Introduction to Mathematical Logic												
Module level, if applicable	Bachelor												
Code, if applicable	MMM-1201												
Subtitle, if applicable	-												
Courses, if applicable	Introduction to Mathematical Logic												
Semester(s) in which the module is taught	1 <sup>st</sup> (first)												
Person responsible for the module	Chair of the Lab. of Algebra												
Lecturer(s)	Dr. Budi Surodjo, M.Si. Dr. Ari Suparwanto, M.Si.												
Language	Bahasa Indonesia												
Relation to curriculum	Compulsory course in the first year (1 <sup>st</sup> semester) Bachelor Degree												
Type of teaching, contact hours	150 minutes lectures and 180 minutes structured activities per week												
Workload	Total workload is 136 hours per semester, which consists of 150 minutes lectures per week for 14 weeks, 180 minutes structured activities per week, 180 minutes individual study per week, in total is 16 weeks per semester, including mid exam and final exam.												
Credit points	3 (three)												
Requirements according to the examination regulations	Students have taken Introduction to Mathematical Logic course (MMM-1201) and have an examination card where the course is stated on.												
Recommended prerequisites	-												
Module objectives/intended learning outcomes	After completed this course students should have: CO.1. Ability to recognize tautology and proving methods CO.2. Ability to apply the proving methods to prove simple mathematical problems CO.3. Ability to apply any problems in other fields using the proving methods. CO.4. Ability to recognize concepts of sets and functions. CO.5. Ability to prove any simple mathematical properties due to set and functions												
Content	Universe of discourse; Declarative sentences; Negation, conjunction, disjunction, implication, biimplication; Tables of truth, Tautology and Proving methods: direct and indirect proofs, mathematical induction; Constanta and variable; Universal quantifier and existensial quantifier; Writing using quantifiers; Set, Operations on Set and its properties; Relations and partitions; Functions : Injective, Surjective, and Bijective, Inverse Functions, Characteristic and restriction. Special sets : power set and Cartesian product.												
Study and examination requirements and forms of examination	The final mark will be weighted as follows: <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>No</th> <th>Assessment methods (components, activities)</th> <th>Weight (percentage)</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Final Examination</td> <td>40%</td> </tr> <tr> <td>2</td> <td>Mid-Term Examination</td> <td>30%</td> </tr> <tr> <td>3</td> <td>Class Activities: Quiz, Homework, etc.</td> <td>30%</td> </tr> </tbody> </table> <p>The initial cut-off points for grades A, B, C, and D should not be less than 80%, 70%, 50%, and 40%, respectively.</p>	No	Assessment methods (components, activities)	Weight (percentage)	1	Final Examination	40%	2	Mid-Term Examination	30%	3	Class Activities: Quiz, Homework, etc.	30%
No	Assessment methods (components, activities)	Weight (percentage)											
1	Final Examination	40%											
2	Mid-Term Examination	30%											
3	Class Activities: Quiz, Homework, etc.	30%											
Media employed	Projector, board, laptop, e-learning via <a href="http://elisa.ugm.ac.id">http://elisa.ugm.ac.id</a>
